

## **ECOMEMBRANE S.P.A. SIGNS A FRAMEWORK CONTRACT WITH A LEADING ENERGY OPERATOR FOR THE SUPPLY AND INSTALLATION OF COMPONENTS FOR COVERAGE**

Currently, Ecomembrane is among the few Italian companies able to offer a complete service to large customers in the energy sector, guaranteeing efficiency and quality at every stage of the process

Gadesco Pieve Delmona (CR), 25th June 2024 **Ecomembrane S.p.A. (ISIN IT0005543332)**, leading Company in the design and construction of gas storage and containment systems for green energy production, listed on the EGM segment of Borsa Italiana S.p.A, announces to have signed, following a tenders, a three-year Framework Contract with a leading Italian energy operator for the **supply and installation of components** for coverage systems **for a maximum amount**, estimated and not guaranteed, **equal to Euro 2,700,000**, with the client's right to increase this amount up to a maximum of 50% and/or to extend the duration of the contract up to a maximum of a further 24 months.

The main objectives of the supplies and services covered by the agreement are: (i) maintenance and revamping activities on gasometric domes and covers currently installed on biogas plants and (ii) the conversion of some biogas plants for biomethane production.

**Lorenzo Spedini, CEO of Ecomembrane**, said: *“This contract once again testifies the reliability of our products and confirms Ecomembrane's leading position among the major players in the sector. The nature of the agreement also confirms the trend towards medium and long-term contracts for multiple plants.”*

The purchase of materials will be finalised when orders are issued, each of them subject to the obtaining of the Plant Authorisation Decree and the subsequent award of the incentive through a GSE auction.

## **Information about Ecomembrane**

*Ecomembrane S.p.A., with registered office in Gadesco Pieve Delmona (Cremona) and North Little Rock (Arkansas, USA), has been operating in the renewable energies and biogas sector since 2000 and is managed by its Founder and CEO, Lorenzo Spedini. Ecomembrane considers itself one of the founding fathers of the modern era membrane gasholders and is specialised in producing gasholders, heat shields for anaerobic digesters, odour control-covers made in PVC-coated fabric membrane and all parts of products needed for the combustion of biogas and the production of electricity. With 10 patents active in the sector, the Company designs, produces, markets and installs components for biogas and biomethane production plants and gas storage systems such as biogas, methane, CO2, hydrogen. The Company currently has more than 70 employees and is present commercially on all continents and in 40 countries, with offices and production units in Italy and the USA. There are more than 1200 products installed and tested all over the world, from Minnesota (United States) to South Korea, from Italy to Turkey and Malesia. The commercial network is managed directly by Ecomembrane personnel for the Italian and American market, whereas it uses a widespread distributor network for the rest of the world.*
